

**ASP.NET**  
**TRAINING REPORT**

*Submitted by*

**RAJARSHI TARAFDAR**

*Semester: 7th*

*Roll No.: 16900111069*

*In partial fulfillment for the award of the degree*

*Of*

**BACHELOR OF TECHNOLOGY**

*In*

**COMPUTER SCIENCE & ENGINEERING**

**Academy of Technology**  
**Aedconagar, Hooghly – 712121**

2014

## **ACKNOWLEDGEMENT**

I would like to express my gratitude to all those who gave me the assistance to complete this Training on “Asp.net”. I am grateful to my mentor Avranil Tah (ESL) for providing me with the guidance for the project.

I also want to thank my group members & friends for their help, support and interest which helped me to complete the assignment in time.

Especially, I would like to give my special thanks to my parents whose interminable love and encouragement was of great help in difficult times.

Rajarshi Tarafdar

Roll No: *16900111069*

## **ASP.NET,C#**

ASP.NET provides services to allow the creation, deployment, and execution of Web Applications and Web Services

Like ASP, ASP.NET is a server-side technology

Web Applications are built using Web Forms. ASP.NET comes with built-in Web Forms controls, which are responsible for generating the user interface. They mirror typical HTML widgets like text boxes or buttons. If these controls do not fit your needs, you are free to create your own user controls.

Web Forms are designed to make building web-based applications as easy as building Visual Basic applications

Technologies used:ASP,ASP Web Pages in the form of CSHTML,Razor,CSS,Javascript,BootStrap etc

IDE-Webmatrix

Here is the overview of the screenshots of the webpages and their related functionalities.

The user can

1>Sign up in this forum

2>Use his information to login successfully

3>Based on the activities and the no of followers in the forum one can find the most number of reputed users in the forum.

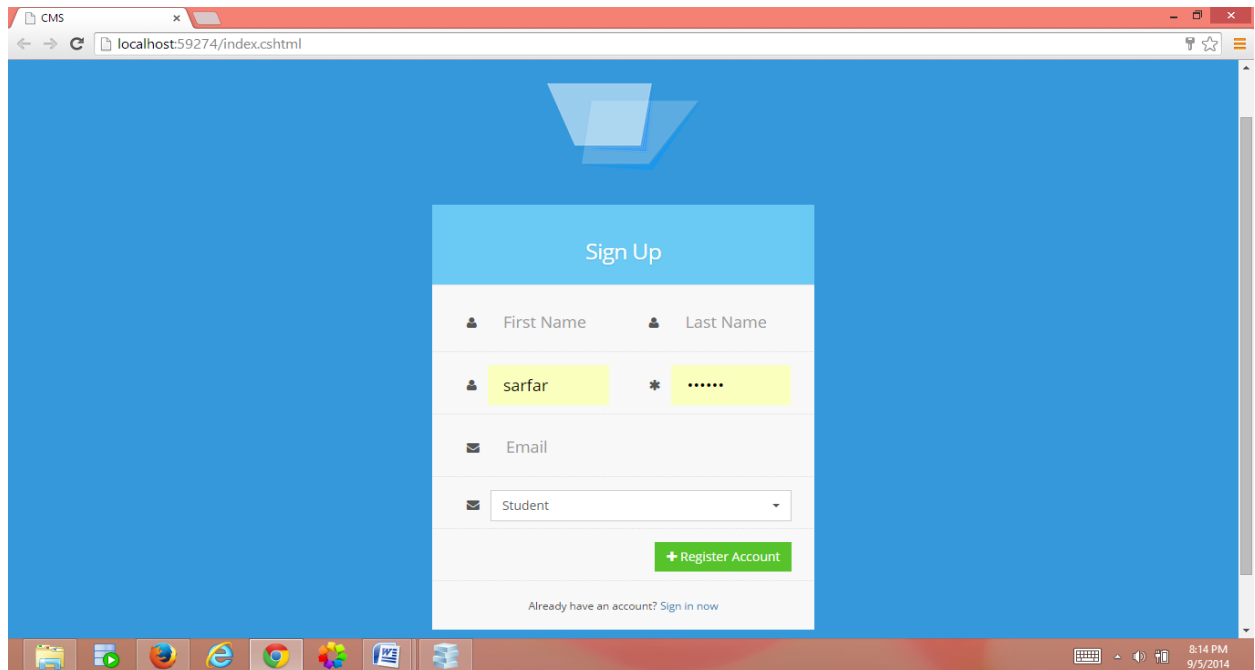

4>One can add,update,delete topic to participate in this forum.

5>One can add group in the forum.There are two options open and closed.
